## SKILLS

React JS | Node JS | MongoDB | CSS | Tailwind CSS | Firebase | HTML | JavaScript | Git | Bootstrap | C++

## LANGUAGES

Hindi
*Full Professional Proficiency*

English
*Full Professional Proficiency*

## INTERESTS

Coding

Development

# Anuparna Ganguly

MERN Stack developer

A goal-oriented, determined and responsible person with the passion for coding. I am a M.Sc graduate student in Computer Science .I am interested in Web development and Web designing. I have worked on various projects with javaScript, React JS ,Node JS , Express , MongoDB and Firebase.

## EDUCATION

### M.Sc in Computer Science
Visva Bharati University

*12/2020 - 06/2022* — *7.96 CGPA*

### B.Sc in Computer Science
Gour Mahavidyala

*06/2017 - 06/2020* — *72.5 percentage*

### Higher Secondary
Malda Girls High School

*01/2014 - 03/2015* — *68.2 percentage*

*Higher Secondary*

- WBCHSC

## PERSONAL PROJECTS

### MERN Stack Musicial App
- This is a MERN Stack Musical App using **React Js,Node Js, MongoDb, Redux , Firebase , Tailwind CSS** where you can upload your Songs ,new Artists and Albums only when you log in as an Admin and you can listen Musics by login using Google Authentication

### Portfolio Website
- This is a digital Portfolio app using **React Js, Tailwind CSS** containing my skills, expertise, my educational backgrounds and my personal projects

### Resturant Booking and Food Delivery App
- This is a food delivery app using **React Js, Redux, Bootstrap, Material UI** where you can order some food and you can book your table for the Resturant

### Digital Clock
- This a Digital Clock App using **HTML, CSS, JavaScript**

### Random Generated Multiplication App
- This a multiplication app using **HTML , CSS , javaScript** where random multiplication will generate over time if you can give the right answer then you will get +1 point otherwise your points will decrease by one

### Image Classification Using CNN algorithm
- In this project CNN algoeithm is used to trained the CNN model to classify photographs of cifar-10 dataset. Here python 3.8 is used as programming language , Anaconda as open source python distribution and Keras deep learning API(high-level).

### Hamiltonicity of a Cubical Graph
- In this work, the Hamiltonicity Cycly Existence Problem on a n-dymensional cubical graph is studied and proved that there always exists a Hamiltonian cycle on a simple n-dymensional cubical graph and can be solved in linear time

## ACHIEVEMENTS

Achieved 2nd position in Coding Competition in Visva Bharati Code Fest (2018)
